COMPANY PROFILE

Amadaxtreme Mission Statement

Amadaxtreme is fully committed to use its skills in craftsmanship, technologies for efficiency and excellence and human resources to develop designs into safer and more efficient.

Our Principles

Amadaxtreme counterparts in the society by providing technologies and products that contribute safer life and more comfort. Furthermore, we are committed to create and develop products' design that suitable with the global environment.

Company Profile and History

Amadaxtreme Co.,Ltd has expertise in shock absorber for more than 20 years in Thailand. We are well organized, experienced, and highly skilled company in developing and manufacturing shock absorber in offroad style and OEM. For this reason, we are confident to meet your demand with superior quality.

1985 Amadaxtreme was established as manufacturer. The products' design and quality control system were based on international standards.

1990 Expanded the export to Asian market.

2001 Focused on offroad market. Started to produce products' based on customers' requirements.

2002 Manufactured the parts of the shocks.
Won as Champion in Rainforest Challenge in Malaysia

2007 Champion in the following competitions :Outback Challenge in Australia, Rainforest Challenge in Malaysia and Thailand's Offroad Trophy Challenge

2009 Champion in Borneo Safari in Malaysia

2010 Champion in RFC China
Amadaxtreme was certified by the BOI : The Board of Investment of Thailand
Expanded the market in Australia.

2011 Champion in Tough Tracks 4x4 Challenge in Australia

2012 Developed the system of ISO/TS 16949 : 2009

WARRANTY INFORMATION

Amadaxtreme warrants the original buyer, when purchased new authorized Amadaxtreme reseller and distributors from date of retail sale. Product is warranted against defects in material or worker that cause the product perform below the specified set by Amadaxtreme

Amadaxtreme will repair or replace any parts which are found on defective. All warranty claims must be submitted by original purchased store unless other wise arranged. The product will returned to Amadaxtreme for repair or assessment. Amadaxtreme will not be responsible for postage or remove costs and may considered upon discretion by Amadaxtreme in the case of claim being rarified.

- When is the warranty will not apply

- 1) Neglect or misuse are evident
- 2) Products has been modified
- 3) The vehicles are not the recommended vehicle of use
- 4) Used in racing condition without prior consent of Amadaxtreme
- 5) Used over the expectations of the original vehicle manufacturer.

- Returned of used product

- 1) Outside warranty period
- 2) Without fault, will reject of your claim and be returned at buyer's expense

- Before installation of any products, please ensure you have received the correct parts for your application.

Amadaxtreme warranty is applicable with in 60,000 km. used in a vehicle or one year warranty period after fitment.

SUSPENSION:

All suspension must safety check at 500 km. after fitment. Fitment should be performed by licensed mechanic, or authorized with the suspension installations. When the product is installed with anything other than the genuine parts of Amadaxtreme component, that may become void. Special tools may be required when fitting some parts including struts. The warranty will not covered when damage to products through fitment error.

FITTING:

The price of fitting is determined by the individual fitting agent.

CHOOSING THE RIGHT SHOCK ABSORBER

Choosing The Right Adventure series Shock Absorber

Compression	Rebound		Length		Code
X	X	-	X X	-	X X X
I	I	Soft	Length (22)		Code (502)
K	C				
H	D				
F	E				
G	A	Hard			

Types of Adventure Series

Everyone has its own purpose of installing shock and to meet that we developed two special types.

- A. Comfort Specialized as the harder shock. Likely for soft, smooth and comfort in driving. It is suited for light cars.
- B. Sport Specialized as the harder shock. Suitable for cars that require speed driving. Likely for confidence in the use of speed and sport style, Used for heavy cars, trucks and off road cars. Suited for vehicles with big wheels and installed accessories such as bumper, canopy and winch

I, K, H, F, G Compression (both comfort and sport)
I, C, D, E, A Rebound (both comfort and sport)

Explanation of the code of shocks.

A

The arrangement of the letters in compression (I-G) and rebound (I-A) vary its level of softness and hardness. Example ; I is softer then K and K is harder than I (compression) ; I is softer than C and C is harder than I (rebound)

B

EX. 22 This refers to the length of the shock

C

EX. 502 This refers to the code design of the shock pin and ear

Everyone must consider the type and weight of the car you're going to use with. The heavier and bigger the car is, it needs a harder compression and rebound. The lighter and smaller the car is, the softer compression and rebound you need.

ADVENTURE SERIE

FEATURES

- 2.25" (57 mm.) Body diameter
- 20 mm diameter piston rod
- 40 mm diameter piston
- Automatic Valve
- Teflon Coating Piston
- Include protective bush
- Design to add strength and durability
- Twin tube type
- Rubber bushings.

The purpose of the shocks that you wanted

- Comfort = for those who like soft, comfort and
(Softer) smooth driving on the road ,for light trucks
- Sport = for driving fast. Need sport confidence in
(Harder) the use of speed and sport style. Used for car with
big wheels, installed bumper and winch of
off-road decorating style

EXPLORER II REMOTE RESERVOIR

BENEFITS

- Optimizes shock performance
- Customer requirement
- Develop shock performance and good quality
- Monotube subtank remote reservoir pipe system from the gas separation system
- Tunable velocity-sensitive sandwich valve
- Made to order 14" - 40" inch.

FEATURES

- 52 mm. Body diameter
- Large 20 mm. Chrome piston rod
- 46 mm diameter piston
- Nitrogen gas pressurized to 200PSI
- Polyurethane bushings
- Steel Outside Cylinder with chrome plate
- Adjustable to high-low (as you prefer)

EXPLORER I REMOTE RESERVOIR

BENEFITS

- Optimizes shock performance
- Enhance shock performance and durability
- Monotube remote reservoir pipe system from the gas separation system
- Tunable velocity- sensitive sandwich valve
- Made to order 22" - 24" inch

FEATURES

- 52 mm. Body diameter
- Large 20 mm. Chrome piston rod
- 46 mm diameter piston
- Nitrogen gas pressurized to 200 PSI;
- upper and lower made of Aluminium with
- Blue, Gold and Orange Anodized
- Spherical bearing bushings
- Cylinder made of steel with chrome plate
- Adjustable to high-low (as you prefer)

DEFENDER COILOVER SHOCKS

BENEFITS

- Optimizes shock performance
- Included everything you need
- Enhance shock performance and durability
- Monotube subtank remote reservoir pipe system from the gas separation system
- Tunable velocity- sensitive sandwich valve
- Made to order 26" - 44" inch.

FEATURES

- 52 mm. Body diameter
- Large 20 mm. Chrome piston rod
- 46 mm diameter piston
- Nitrogen gas pressurized to 200 PSI;
- Spherical bearing bushings
- Cylinder made of steel with chrome plate
- Adjustable to high-low (as you prefer)

BLACK HAWK SERIE

Body

- Smooth-bore, clear coated, zinc plated, honed seamless alloy bodies

Components

- Black anodized 6061-T6 billet aluminum

Shaft

- 20mm. hard chrome plated stainless steel 17-4 HV900

Piston

- Race-developed high-flow piston design

Reservoir

- Piggy Back

Optional

- 90 degree fittings

Custom hose lengths

- available

Mounting

- Teflon-lined, heat-treated, alloy steel spherical bearings

2.5 EVOL SMOOTH BODY SHOCK

Body

- Smooth-bore, clear coated, zinc plated, honed seamless alloy bodies

Components

- Black anodized 6061-T6 billet aluminum

Shaft

- 22mm. hard chrome plated stainless steel 17-4 HV900

Piston

- Race-developed high-flow piston design

Reservoir

- Remote

Custom hose lengths

- available

Mounting

- Teflon-lined, heat-treated, alloy steel spherical bearings

STEERING DAMPER

With the installation of all lift kits and larger tires it is important to check the condition of your steering stabilizer. If the stabilizer is worn out or is leaking it should be replaced.

Steering stabilizers are designed to restrain "bump steering" and front end vibration giving added life to tires, ball joints, and other steering components. A multiple stabilizer kit is recommended for vehicles equipped with a snow plow, winch, or 35" tires and above.

SPECIFICATIONS

- White powder coat finish
- Improves tire and ball joint wear
- Polyurethane bushings for long life
- Chromed hardened 20 mm. piston rod
- Improves control and handling for oversize tires
- Available in single, dual and OE mounts for most applications

COIL SPRING AMX

Leaf Springs: Part number suffix A.

Will provide some lift from standard and used where comfort is preferred rather than firm control. This design is best suited to light or no load applications.

Coil and Leaf Springs: Part number suffix B.

Ride will be firmer than original by around 20% and suits light to medium loads. This spring is recommended when the given load may be occasional or temporary. Excellent for vehicles which have some accessories fitted.

Coil and Leaf Springs: Part number suffix C.

Will provide excellent support for vehicle's carrying constant heavy loads. Suitable when multiple heavy accessories or steel tray's toolboxes fitted. These springs should be avoided when vehicle has light or no load present.

Leaf Springs: Part number suffix D.

Extra heavy duty springs designed to support heavier constant loads when heavy accessories are combined with heavy payloads
